**U1:**

As William, a TEQ Customer Service employee, I want to be able to submit different forms depending on the client and be able to fill in missing information in the forms about them.

**U2:**

As Jessica, a TEQ Customer Service employee (settlement worker), I want to be able to import any previously filled forms into the database, so that I could finish the form.

**U3:**

As Jesse, a TEQ employee, I want to be able to fix, change, or update fields of a previously filled form so that I can fix a mistake within the system.

**U4:**

As Jessica, a TEQ Customer Service employee (settlement worker), I want to be able to fill in a form and have previously provided information to be automatically filled in within the current form.

**U5:**

As Jesse, a TEQ employee, I want to be able to use a query, form field, and a keyword to find a list of clients that match and display it in a page or within a text file.

**U6:**

As Jesse, a TEQ employee, I want to be able to use a query, a basic operator like >, and a form field to find a list of clients that match and display it in a page or within a text file.

**U7:**

As Jesse, a TEQ employee, I want to be able to use a query, a basic operator word like most, and a form field to find a list of clients that match and display it in a page or within a text file.

**U8:**

As Jesse, a TEQ employee, I want to be able to use a query and a combination of operations to find a list of clients that match and display it in a page or within a text file.

**U9:**

As Steve, a executive director, I want to be able to create a report by using queries to construct a section of the report and store it in a text file.

**U10:**

As Steve, a executive director, I want to be able to edit the report by deleting a section of the report that was generated by a query or by changing the wording during the process of creating the report.
